

Midterm Design Report

Each student is to compile their own initial design report. The audience for this report is your future group members. This report should be a maximum of 5 pages and will consist of:

1. Analysis of the Problem including anticipated issues

2. Design sketches\concepts including:

- Robot configuration

- Actuators

- Sensors

- Outline of control components

Each group will then select a design or a combination of designs for the development of their robotic system.
